COMPLETE FOR FES ACCESS	
A valid FRS ID is necessary to access FES. FES will use your FRS Value based security for access control. If you do not have a current FRS ID, please apply for it when you apply for your FES ID. Forms to Request FRS access should be available at your department or college Business office.  FES uses departmental and account/fund group/corporation (account Based) value based security.  Most FES access is based upon department. As a general rule, you will only be able to view faculty members of departments for which you have "departmental based security".  However, some screens use account based security. These screens will allow you to see some data for any faculty members, using an account in your security, regardless of the department to which they belong.  All users requesting online access to FES will automatically be given access to reports in BETA 93. These reports are produced and controlled by departmental access.
